
SUMMARY

Software developer with a QA and business-analysis foundation, building full-stack web and cross-platform mobile apps in TypeScript, React/Next.js, React Native, and Python. 5+ years across the software lifecycle—from API and test automation to shipping production form-authoring tools—with hands-on DevOps (Docker, Kubernetes, GCP) and a QA-honed eye for reliability.

SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL, Bash, HTML5, CSS3
- **Frontend & Mobile:** React, Next.js (App Router), React Native/Expo, Tailwind CSS, NativeWind
- **Backend:** Node.js, FastAPI, SQLAlchemy, Prisma, REST APIs, PostgreSQL/PostGIS, JWT/NextAuth, Zod
- **DevOps & QA:** Docker, Kubernetes, Helm, Git, CI/CD, GCP, Linux, Postman/Newman, Splunk, Jira

EXPERIENCE

Software Developer, Mevi 2024 – Present

- Own, maintain, and develop the company's forms across multiple U.S. state locales, including form upload and publishing
- Build and maintain **Mevi Form Studio**, a React app for authoring form-definition JSON (sections, fields, signer roles, rules) that powers the company's Forms platform
- Built PDF annotation tooling (field, signature, and initial placement) and JSON import/export with reliable round-trip preservation
- Implemented cloud publishing to multiple Forms environments with a revision browser, per-locale registry validation, and GCP Cloud Storage seed tooling

Quality Assurance Analyst, Vast Bank 04/2023 – 09/2023

- Generated and executed regression, smoke, and exploratory test cases across all production and development environments; coordinated intake testing with middleware and third-party providers
- Maintained the company website in HubSpot, resolving issues and shipping enhancements with custom CSS and HTML

Senior QA Engineer, Mevi 11/2021 – 02/2023

- Designed Postman/Newman libraries for validating RESTful APIs, integrated into the CI/CD pipeline
- Traced bugs across services with Splunk/SPL; ran local Docker/Kubernetes/Helm/PostgreSQL environments to support feature development and testing

QA Engineer & Business Analyst, Mevi 12/2020 – 11/2021

- Digitized state/association real-estate contracts into JSON models—the foundation for the form tooling now built as a developer—with front-end development and API testing in HTML5/CSS3/JavaScript

PROJECTS

Tourify — *live-music tour finder (personal)*

- Cross-platform mobile app (iOS/Android/web) in Expo/React Native, TypeScript, NativeWind, backed by a FastAPI + PostgreSQL/PostGIS API with JWT auth and a scheduled worker for event sync and alerts
- Live demo at tourify-j82w.vercel.app — seeded account, real venues and tour dates; design notes at johnnyfreda.github.io/tourify

EDUCATION

Metropolitan State University of Denver — Computer Science, B.S. (Incomplete) Fall 2019 – Summer 2021

St. Petersburg College — Tarpon Springs, FL — Associate of Arts Fall 2018
